Fund Performance is the Total Return, representing the sum of the Growth (or Price) Return and Distribution Return.

Past Performance is not a reliable indicator of future performance.

Performance returns for periods of less than one year are not annualised and have been calculated based on changes in the net asset value of the Fund rather than the last quoted price. Performance is shown net of management fees and costs but does not reflect the brokerage fees or the bid/ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange. Distributions are assumed to be reinvested under the Dividend Reinvestment Program (DRP). Investment returns and principal value will fluctuate, so you may have a gain or loss when units are sold. Current performance may be higher or lower than that quoted.

The index returns reflect all items of income, gain and loss and the reinvestment of dividends (net of withholding tax) and other income. The index returns are unmanaged and do not reflect the deduction of any fees or expenses.
